

STABILUS: Gas Springs and Vibration Dampers for the World Market

STABILUS was founded in 1934 and is today the world market leader in the area of gas pressure springs and hydraulic vibration dampers. The company with headquarters in Koblenz, Germany, has a total of 3300 employees at eleven production locations in eleven different countries on five continents and maintains a worldwide sales and service network. In 2005/2006, overall sales amounted to EUR 388 million.

Opening, closing, lifting, lowering, damping and adjusting: In addition to hydropneumatic adjustment elements and hydraulic vibration dampers, the STABILUS product line also comprises hydraulic door-stays and automatic door opening and closing systems in many variations. The company makes high-quality gas springs and dampers that are used in a wide variety of industries - ranging from automotive and vehicle design to industrial applications and swivel chair manufacture. Worldwide, STABILUS produces over 125 million gas springs with 15,000 product variants. All in all, the company has produced more than 1.5 billion gas springs in large and small series today. The experience gained during these processes then flows into the development of new, innovative kinematics solutions. Customers include leading automakers and industrial companies, such as manufacturers of earth-moving equipment, household appliances, office furniture, as well as medical technology manufacturers.

STABILUS has state-of-the-art production systems and development tools at all locations. The company is certified according to DIN EN ISO 9001, ISO/TS 16949, VDA 6.1, EAQF, and AVSQ. The environmental management is audited according to DIN ISO 14001. It has an Internet presence at www.stabilus.de and www.stabilus.com.
